

# **KUMARAGURU COLLEGE OF TECHNOLOGY**

An autonomous Institution affiliated to Anna University, Chennai

**COIMBATORE – 641 049.**

## **B.TECH. INFORMATION TECHNOLOGY**

**REGULATION 2024 (2025 Batch)**

**I to VIII Semesters**

**Department of Information Technology**

Signature of BOS Chairman, IT

## VISION

The department of Information Technology aspires to become a school of excellence in providing quality education, constructive research and professional opportunities in Information Technology.

## MISSION

- To provide academic programs that engage, enlighten and empower the students to learn technology through practice, service and outreach
- To educate the students about social responsibilities and entrepreneurship
- To encourage research through continuous improvement in infrastructure, curriculum and faculty development in collaboration with industry and institutions.

## PROGRAM SPECIFIC OUTCOMES (PSOs)

The Program Specific Outcomes of Information Technology Undergraduate Program are:

### **PSO1: IT Systems Innovation and Management**

Graduates will design and manage secure, scalable IT systems that address real-world challenges with technological and social relevance.

### **PSO2: Emerging Tech for Business Impact**

Graduates will apply cutting-edge technologies to create innovative, ethical solutions that drive business transformation and community advancement.

Signature of BOS Chairman, IT

## PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

**PEO1:** Graduates will demonstrate career progression in Information and Communication Technologies by acquiring higher qualifications or industry certifications and advancing in professional roles.

**PEO2:** Graduates will be leaders in their chosen field

**PEO3:** Graduates will utilize the acquired technical skills and knowledge for the benefit of society

## PROGRAM OUTCOMES (POs)

Graduates of the Computer Science and Engineering Undergraduate Program should have the ability to:

**PO1: Engineering Knowledge:** Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization to develop to the solution of complex engineering problems.

**PO2: Problem Analysis:** Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development.

**PO3: Design/Development of Solutions:** Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required.

**PO4: Conduct Investigations of Complex Problems:** Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions.

Signature of BOS Chairman, IT

**PO5: Engineering Tool Usage:** Create, select, and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems.

**PO6: The Engineer and The World:** Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture, and environment.

**PO7: Ethics:** Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws.

**PO8: Individual and Collaborative Teamwork:** Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

**PO9: Communication:** Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.

**PO10: Project Management and Finance:** Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

**PO11: Life-Long Learning:** Recognize the need for and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change.

Signature of BOS Chairman, IT

Pre-requisite courses	-	Data Book / Code book (If any)	-
-----------------------	---	--------------------------------	---

Course Objectives:	
The purpose of taking this course is to	
1	enhance students' abilities to communicate ideas effectively, both orally and in writing, by developing skills in organizing thoughts clearly and logically and expressing them through well-structured paragraphs and concise summaries.
2	enable students to critically evaluate and synthesize information from multiple sources and utilize suitable writing techniques and formats to produce professional-quality content tailored to various contexts.
3	foster active listening, critical reading, and reflective thinking, empowering students to create engaging, relevant, and informative content by applying effective communication strategies across diverse platforms.

Course Outcomes		
After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO1	demonstrate proficiency in delivering ideas effectively, both in speaking and writing, with a deeper understanding of the content and the ability to convey complex ideas through well-structured paragraphs and summaries.	Ap
CO2	create and present original content by evaluating information from multiple sources and employing appropriate formats and writing strategies across various professional contexts.	C
CO3	produce engaging and informative content through active listening, reading, reflection, and effective communication skills.	E

24MAI114	APPLIED LINEAR ALGEBRA AND CALCULUS (Common to CS, IT, AD)	L	T	P	J	C
		3	0	2	0	4
BS		SDG		4, 9		

Pre-requisite courses	-	Data Book / Code book (If any)	-
-----------------------	---	--------------------------------	---

**Course Objectives:**

The purpose of taking this course is to:

1	understand and apply the concepts of eigenvalues, eigenvectors, and matrix transformations to solve real-world linear algebra problems relevant to computing and data sciences.
2	develop proficiency in vector spaces, subspaces, and matrix decomposition techniques (LU and SVD) for effective analysis and solution of linear systems in engineering and data analytics.
3	apply differentiation and integration techniques, including optimization and calculation of areas and volumes, to solve practical problems in engineering and computational contexts.
4	master multivariate calculus concepts such as partial derivatives, Taylor series, and constrained optimization methods for applications in machine learning and data science algorithms.
5	provide MATLAB techniques for solving first-order and higher-order ordinary differential equations to model and analyse dynamic systems in computing and engineering.

**Course Outcomes**

After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO1	apply the concepts of eigenvalues and eigenvectors to diagonalize matrices and solve systems of linear equations in real-world applications.	Ap
CO2	apply the concepts of vector spaces, subspaces and matrix decomposition techniques such as LU decomposition and Singular Value Decomposition to solve linear systems and reduce matrix complexity in data science and engineering problems.	Ap
CO3	apply differentiation techniques to solve optimization problems including finding maxima and minima and use integration methods to compute arc lengths, areas between curves and volumes of solids for practical engineering and computational applications.	Ap
CO4	apply multivariate calculus concepts such as partial derivatives and Taylor's series expansion to analyse and approximate multivariable functions for solving engineering and computational problems.	Ap
CO5	analyse and solve constrained and unconstrained optimization problems using the Lagrange multiplier method and determine the maxima and minima of functions with two or more variables relevant to machine learning and data science applications.	An

Course Content	
<p><b>MATRICES</b> Eigenvalues and eigenvectors of a real matrix – Properties of eigenvalues and eigenvectors (Statement only) – Cayley Hamilton theorem (excluding proof) - Orthogonal matrices – Orthogonal transformation of a symmetric matrix to diagonal form – Reduction of quadratic form to canonical form by orthogonal transformation.</p> <p><b>Practical Component</b> Matrix operations like addition, subtraction, multiplication, inverse, rank and transpose, eigenvalues and eigenvectors of a given matrix and verify the diagonalization of the matrix.</p>	<p><b>9 Hours</b></p> <p><b>6 Hours</b></p>

  
 Signature of BOS Chairman, IT

Cayley-Hamilton theorem to find the characteristic equation of a matrix and verify that the matrix satisfies its own characteristic equation.		
<b>VECTOR SPACES</b> Vector spaces and subspaces over real space – Euclidean spaces - Linear independence and dependence - Basis and Dimension - Null spaces, column spaces and Linear transformations - LU decomposition method - Singular Value Decomposition method. (No proofs of any theorems, only problems based on these topics)  <b>Practical Component</b> Linearly independent and dependent vectors and Singular Value Decomposition. Curve Tracing, 3D and Surface plotting.		<b>9 Hours</b>          <b>6 Hours</b>
<b>APPLICATIONS OF CALCULUS</b> Differentiation: Mean Value Theorem-Maxima and Minima – Integration: Arc Length, Area between two curves, Area of a Surface of Revolution, Volume of solids  <b>Practical Component</b> First and second derivatives of a given function, area between two curves and the volume of a solid of revolution Optimization problems in single variables.		<b>9 Hours</b>          <b>6 Hours</b>
<b>FUNCTIONS OF SEVERAL VARIABLES</b> Partial derivatives – Homogeneous functions and Euler’s theorem –Total derivative – Taylor’s series expansion - Maxima and minima of functions of two variables – Constrained maxima and minima: Lagrange’s multiplier method with single constraints – Jacobians  <b>Practical Component</b> Computing partial derivatives of multivariable functions Optimization problems in multiple variables		<b>9 Hours</b>          <b>6 Hours</b>
<b>ORDINARY DIFFERENTIAL EQUATIONS</b> Solutions of first order linear ODE: Leibnitz equation and Bernoulli’s equation – Linear, homogeneous differential equations of second and higher order with constant coefficients.  <b>Practical Component</b> Solution of first order ordinary differential equations. Solution of second and higher order ordinary differential equations		<b>9 Hours</b>          <b>6 Hours</b>
<b>Theory Hours:</b>	<b>45</b>	
<b>Tutorial Hours:</b>	<b>0</b>	
<b>Practical Hours:</b>	<b>30</b>

24PHI101	APPLIED PHYSICS FOR COMPUTING (Common to AD, CS, IT)	L	T	P	J	C
		3	0	2	0	4
BS		SDG		7, 9, 12		

Pre-requisite courses	High School Education	Data Book / Code book (If any)	-
-----------------------	-----------------------	--------------------------------	---

Course Objectives:	
The purpose of taking this course is to:	
1	understand and apply fundamental principles of wave behaviour, optics, and acoustics, and their practical applications in engineering.
2	develop a solid understanding of quantum mechanics and quantum computing, and their relevance to modern technology.
3	integrate physics principles across mechanics, and thermal physics to solve real-world problems.
4	foster analytical and problem-solving skills by applying key concepts to real-world engineering and technological challenges.

Course Outcomes		
After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO 1	apply wave behaviour in optics and demonstrate its applications in real-world technologies.	Ap
CO 2	understand quantum mechanics principles and state their application in quantum information systems.	Ap
CO 3	implement qubits and quantum gates to demonstrate the advantages of quantum computing.	Ap
CO 4	examine the principles of heat transfer mechanisms for effective thermal management in engineering applications.	Ap
CO 5	apply vectors and moments to equilibrium problems in distributed-force systems with free body diagrams	Ap
CO 6	analyse and interpret acoustic principles to assess sound quality and design strategies for effective noise control in real-time applications.	An

ES		SDG	9			
Pre-requisite courses	-	Data Book / Code book (If any)	-			

### Course Objectives:

The purpose of taking this course is to:

1	understand digital systems, number systems, and Boolean algebra for logic simplification and circuit design.
2	learn to analyse and design Combinational and Sequential Logic Circuits
3	explore digital logic families and implement logic circuits using programmable devices.

### Course Outcomes

After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO1	comprehend the fundamental concepts of digital number systems, Boolean algebra, and the basic principles of digital circuit design.	U
CO2	develop and implement logic functions using Boolean algebra, optimizing them through simplification and employing combinational circuit components.	Ap
CO3	construct and validate sequential circuits, such as flip-flops, counters, and shift registers, and integrate these into larger digital systems.	Ap
CO4	develop combinational logic circuits using programmable logic devices.	Ap

24HST101	தமிழர் மரபு / HERITAGE OF TAMILS (Common to all Departments)	L	T	P	J	C
		1	0	0	0	1
HS		SDG		4, 11, 16		

Pre-requisite courses	-	Data Book / Code book (If any)	-
-----------------------	---	--------------------------------	---

### Course Objectives:

The purpose of taking this course is to:

1	தமிழ் மொழி மற்றும் இலக்கியத்தின் அடிப்படை அம்சங்களை அறிமுகப்படுத்துதல், அதன் தொன்மைக்காலம் முதல் நவீனகாலம் வரையிலான வளர்ச்சியை விளக்கம் செய்யுதல். Introduce students to the foundational aspects of Tamil language and literature, tracing its evolution from ancient to modern times.
2	தமிழகத்தின் செழுமையான கலாச்சார பாரம்பரியத்தை அறிமுகப்படுத்துதல், பாறை ஓவியக் கலையிலிருந்து நவீன சிற்ப கலையின்படி அதன் கலை வெளிப்பாடுகளை ஆராய்தல். Familiarize students with the rich cultural heritage of Tamil Nadu, exploring its artistic expressions from rock art paintings to contemporary sculptures.
3	தமிழகத்தின் நாட்டுப்புறக் கலைகள் மற்றும் வீரவிளையாட்டுகளை அறிதல்- தினணக்கோட்பாடுகளை ஆராய்தல்- இந்திய தேசிய இயக்கத்தில் தமிழர்களின் பங்கினை அறிதல். To know the folk arts and heroic ames of Tamilnadu-explore the concept of thinai -to know the role of Tamils in Indian National movement.

### Course Outcomes

After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO1	தமிழ் மொழி மற்றும் இலக்கியத்தின் அடிப்படை அறிவை மேம்படுத்துதல். மொழி பண்பாட்டில் எவ்வாறு இணைந்துள்ளது என்பதை உணர்தல். Enhance the fundamental knowledge of Tamil language and literature	U
CO2	பழங்கால பாறை ஓவியங்கள், சிற்பம் என கலைகள் நவீன காலம்வரை எவ்வாறு பயணிக்கிறது என்பதை புரிந்துகொள்ளுதல். Understand the heritage, rock art paintings to modern art sculpture	U
CO3	நாட்டுப்புறக் கலைகள் தற்காப்புக் கலைகளாகவும், உடல் ஆரோக்கியத்தை மேம்படுத்தும் விதமாகவும் அமைவதை அறிந்து கலைகள் மீதான ஆர்வத்தை அதிகரிக்கச் செய்தல்- தமிழர்களின்	Ap

Pre-requisite courses	-	Data Book / Code book (If any)	-
-----------------------	---	--------------------------------	---

**Course Objectives:**

The purpose of taking this course is to:

1	analyse the effectiveness of systems thinking and problem-solving methodologies in applying data-driven insights for innovative solution design.
2	evaluate the impact of transdisciplinary collaboration on creating functional hardware prototypes through fabrication techniques.
3	understand the future trends and implications of technology in developing innovative products.

**Course Outcomes:**

After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO1	recall the fundamental principles of custom hardware design.	R
CO2	understand the appropriate tools and their applications for solving hardware-related problems.	U
CO3	apply systems engineering concepts to real-world hardware design challenges.	Ap

		2	0	0	0	0
VA		SDG	3, 9, 12, 15			
Pre-requisite courses	-	Data Book / Code book (If any)	-			

Course Objectives:	
The purpose of taking this course is to:	
1	provide students with a comprehensive understanding of how emerging technologies like AI, IoT, blockchain, big data, and automation are revolutionizing various industries. Focusing on sectors such as agriculture, education, healthcare, gaming, music, law, and textiles, the course explores the application of these technologies to develop innovative solutions that enhance productivity, sustainability, and user engagement. Students will analyze the impact of digital tools on transforming key sectors and evaluate strategies to improve operational efficiency, creativity, and adaptability. Additionally, the course examines the disruption of traditional business models by these technologies, equipping students with the skills to leverage these changes for innovation and competitiveness in a rapidly evolving landscape.

Course Outcomes		
After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO1	understand the role of digital tools in education and healthcare for enhancing user engagement and fostering innovation.	U
CO2	outline the role of technologies in enhancing agricultural practices to demonstrate how these technologies can improve productivity and sustainability in farming.	U
CO3	relate the key technological applications of emerging domains that enhance operational efficiency and creativity.	R

The purpose of taking this course is to:	
1	Demonstrate understanding of different perspectives by analyzing complex personal and professional situations.
2	Engage in thoughtful dialogue and discussions about complex, real-world issues, utilizing critical thinking to assess different viewpoints.
3	Apply role-playing as a tool to enhance understanding of workplace dynamics, conflict resolution, and team collaboration.

Course Outcomes		
After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO 1	Empathize with and understand people in both professional and personal contexts, reflecting on situations from multiple perspectives and participating in activities that mirror career-related scenarios	Ap
CO 2	Analyze and converse critically on complex subjects, demonstrating the ability to approach and deal with various social contexts effectively	An
CO 3	Exhibit skills in role-playing and enacting given situations to navigate diverse social interactions and career-related contexts.	C

24MAI124	MULTIVARIATE CALCULUS AND FORECASTING (Common to AD, CS, IT)	L	T	P	J	C
		3	0	2	0	4
BS		SDG	7, 9			

Pre-requisite courses	24MAI114/ Applied Linear Algebra and Calculus	Data Book / Codes books (If any)	-
-----------------------	---	----------------------------------	---

### Course Objectives:

The purpose of taking this course is to:

1	understand the techniques of evaluating double and triple integrals and applying them to calculate areas and volumes.
2	familiarize students with vector field concepts such as gradient, divergence, and curl, and apply the theorems of Green, Gauss, and Stokes.
3	develop an understanding of the least squares method for fitting various types of curves and its application in forecasting.
4	equip students with knowledge of time series analysis, including construction, trend measurement, and seasonal variation determination.
5	introduce students to numerical methods such as interpolation, numerical differentiation, and numerical integration.

### Course Outcomes

After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO 1	apply double and triple integrals with constant and variable limit concepts to compute areas and volumes in cartesian coordinates.	Ap
CO 2	calculate gradient, divergence, and curl, and verify Green's theorem, Gauss's divergence theorem, and Stokes' theorem in a given vector field.	Ap
CO 3	assess the reliability of predictions using goodness-of-fit measures like $R^2$ , RMSE, MAE, and MAPE for the method of least squares to fit linear, parabolic, cubic, and non-linear curves.	An
CO 4	analyze time series data, and measure trends using methods like moving averages and assess seasonal variations through appropriate techniques.	An
CO 5	apply Newton's interpolation techniques for both forward and backward interpolation, perform numerical differentiation.	Ap
CO 6	apply the concepts of Trapezoidal and Simpson's rules for numerical integration.	Ap

24CSI007	PYTHON FOR COMPUTATIONAL PROBLEM SOLVING (Common to AD, CS, IT)	L	T	P	J	C
		1	0	4	0	3
PC		SDG	9			

Pre-requisite courses	NIL	Data Book / Code book (If any)	NIL
-----------------------	-----	--------------------------------	-----

<b>Course Objectives:</b>	
The purpose of taking this course is to:	
1	Introduce the basics of Python, including data types, operators, and control structures, with a focus on practical implementation.
2	Develop proficiency in iterative statements, string handling, and fundamental data structures like lists, tuples, and dictionaries through extensive lab work.
3	Provide foundational knowledge on modules, functions, object-oriented programming (OOP) concepts, and file handling.
4	Familiarize students with exception handling and Python's standard libraries like NumPy and Pandas for data manipulation.
5	Enable students to apply Python concepts to solve real-world problems through practical, hands-on experiments.

<b>Course Outcomes</b>		
After successful completion of this course, the students shall be able to		<b>Revised Bloom's Taxonomy Levels (RBT)</b>
CO1	Understand Python syntax, data types, operators, and basic control structures.	U
CO2	Apply conditional and iterative constructs for solving logical problems.	Ap
CO3	Implement modular programming concepts, handle strings, and utilize data structures efficiently	Ap
CO4	Demonstrate object-oriented programming, file handling, and exception handling in Python.	Ap
CO5	Utilize libraries like NumPy and Pandas for data analysis and manipulation.	Ap

<p>indexing- List methods - List comprehension. Tuple - Characteristics of tuples- Tuple indexing, Tuple methods. Dictionary: Key-value pairs, Dictionary methods. Sets in Python: Create, Add, Remove with Examples. Python Regular Expressions (RegEx) basics.</p> <p><b>Practical Component:</b> Create Python scripts to demonstrate advanced string manipulation techniques, including RegEx for basic pattern matching. Perform complex operations on lists, tuples, sets, dictionaries, and combinations of all datatypes using various methods. Develop and utilise user-defined modules.</p>	<b>12 Hours</b>
<p><b>Object-Oriented Programming</b> OOP concepts - Creating classes and objects - Self parameter - <code>__init__</code> method. Inheritance &amp; Polymorphism: Types of inheritance, Method Overriding - Concept of Method Overloading in Python.</p> <p><b>Practical Component:</b> Develop a robust OOP-based application to practically demonstrate the core concepts: creating multiple classes and objects, implementing all major types of inheritance, and showcasing polymorphism through method overriding. Implement a solution to simulate method overloading using variable arguments or default parameters.</p>	<b>3 Hours</b>  <b>12 Hours</b>
<p><b>File Handling and Exception Handling</b> File Handling: Reading and writing files, File modes - Working with text and CSV files. Exception Handling: Understanding exceptions - Handling exceptions using try-except-finally - Raising custom exceptions.</p> <p><b>Practical Component:</b> Read and write large amounts of data to text and CSV files using different Python file handling modes. Create a practical utility that processes data from a file, writes results to another file, and is fully protected using robust exception handling. Implement and raise meaningful custom exceptions for validation or specific error conditions.</p>	<b>3 Hours</b>  <b>12 Hours</b>
<p><b>Python Libraries -Numpy and Pandas</b> <b>NumPy Library:</b> Introduction to NumPy, Arrays, Array creation and manipulation, Array operations. Analysing different pipeline structures involving storage - processing, ML components based on requirements.</p>	<b>3 Hours</b>

Signature of BOS Chairman, IT

<p><b>Pandas Library:</b> Series: Creating Series – Indexing - Operations on Series. DataFrames: Creating DataFrames, Data Manipulation. Handling Missing Data: dropna(), fillna(), isnull() functions.</p> <p><b>Practical Component:</b> Perform an extensive array creation, manipulation, and mathematical operations on NumPy arrays. Manipulate real-world or mock datasets using Pandas Series and DataFrames, including data cleaning, filtering, sorting, and handling missing values using appropriate functions.</p>	<b>12 Hours</b>

<b>Course Content</b>	
<b>MANAGERIAL ECONOMICS &amp; DEMAND ESTIMATION</b> Managerial goals vs. shareholder value; Law of demand & supply; elasticity (price, income, cross); marginal utility & consumer surplus; exceptions to the law of demand; quantitative & qualitative demand-forecasting techniques (time-series, causal models, Delphi, big-data tools); introduction to behavioural economics for managers.	<b>9 Hours</b>
<b>COST &amp; FINANCIAL ACCOUNTING FUNDAMENTALS</b> Cost concepts—fixed, variable, stepped, sunk, opportunity, relevant; economies & diseconomies of scale; cost-volume-profit analysis; accounting principles & conventions, double-entry system, journal-ledger-trial balance; the accounting equation; preparation of basic Income Statement and Balance Sheet.	<b>9 Hours</b>
<b>FINANCIAL STATEMENT ANALYSIS &amp; CASH-FLOW MANAGEMENT</b> Operating vs. financing & investing cash flows; preparation of the Statement of Cash Flows (IND-AS 7); working-capital management; ratio analysis—liquidity, leverage, profitability, efficiency; advanced cash-flow metrics (EBITDA, FCF, EVA); brief introduction to valuation multiples.	<b>9 Hours</b>
<b>MARKETING PRINCIPLES IN THE DIGITAL ERA</b> Evolution of marketing & the holistic marketing concept; Marketing vs. Selling; customer value & satisfaction; 7 Ps and extended service mix; product-life-cycle strategies; overview of digital marketing (SEO, SEM, social, content, influencer); omnichannel customer journeys.	<b>9 Hours</b>
<b>MARKET RESEARCH, ANALYTICS &amp; STRATEGIC INTEGRATION</b>	<b>9 Hours</b>

  
 Signature of BOS Chairman, IT

Marketing-information systems (MIS); environmental & competitor scanning (PESTLE & Porter 5-forces); STP—segmentation techniques, targeting criteria, positioning maps; basics of marketing analytics (A/B testing, RFM, CLV); integrating finance & marketing for growth strategy—profit-impact of marketing decisions, budgeting, ROI dashboards; capstone case discussion.

24HST102	தமிழரும் தொழில்நுட்பமும்/ TAMILS AND TECHNOLOGY	L	T	P	J	C
		1	0	0	0	1
HS		SDG		4, 8		
Pre-requisite courses	-	Data Book / Code book (If any)			-	

### Course Objectives:

The purpose of taking this course is to:

1	தமிழர்களின் நெசவு மற்றும் பானைத் தொழில்நுட்பத்தை அறிமுகப்படுத்துதல், சங்க கால கட்டிட தொழில்நுட்பத்தை விளக்குதல், கோயில்கள் மற்றும் சிற்பக்கலைகளை ஆராய்தல். introducing weaving and pottery technology of Tamils -Explaining the building technology of the Sangam Period-Explore temples and sculptures.
2	கப்பல், இரும்பு, நாணயங்கள், மணி உருவாக்கும் தொழிற்சாலைகள், ஆகியவற்றை விளக்கம் செய்தல், தமிழகத்தின் தொல்லியல் சான்றுகளின் பழமையை உணர்த்துதல். explain Ship, Iron, Coins, Beads Making Factories. Realizing the Antiquity of Archaeological Evidence of Tamil Nadu
3	வேளாண்மை மற்றும் அறிவியல் தமிழைப் பற்றி அறிதல், இணையத்தில் தமிழின் தேவையை உணர்த்துதல்,தமிழ் மென்பொருள்களை அறிமுகம் செய்தல். knowledge of Agricultural and Scientific Tamil, Realizing the need for Tamil on the Internet, Introducing Tamil software.

### Course Outcomes:

After successful completion of this course, the students shall be able to		Revised Bloom's Taxonomy Levels (RBT)
CO 1	தமிழர்களின் நெசவு மற்றும் பானைத் தொழில்நுட்பத்தின் முக்கியத்துவத்தினை அறிந்து கொள்ளுதல். சங்ககால தமிழர் வளர்த்த அழகுக் கலைகளைத் தெரிந்து கொள்ளுதல். know the importance of weaving and pottery technology of Tamils-To know the Aesthetics arts developed by Sangam Tamils	U

  
 Signature of BOS Chairman, IT

CO 2	கப்பல் கட்டும் கலை, இரும்புத் தொழிற்சாலை, நாணயங்கள் அச்சடித்தல்,மணி உருவாக்கும் தொழிற்சாலைகள், சிலப்பதிகாரத்தில் உள்ள மணிகளின் வகையை அறிதல். knowledge of ship building, ironworks, coinage, minting, and beads making factories,Knowing the types of beads in Silpathikaram.	U
CO 3	வேளாண்மை மற்றும் நீர்ப்பாசன தொழில்நுட்பத்தை அறிந்து கொள்ளல். அறிவியல் தமிழ் மற்றும் கணினித் தமிழைப் புரிந்து கொள்ளுதல். know agriculture and irrigation technology. Understanding Scientific Tamil and Computer Tamil.	Ap

<b>Course Content</b>	
<b>INTRODUCTION TO OPEN-SOURCE TOOLS AND TECHNIQUES</b> Explore the concept of open-source, its underlying principles and its contrast with proprietary software, Discuss the advantages of using open-source tools, such as lower costs, increased innovation, educational value, and community support, walk through to the commonly used open-source tools for electronics design (KiCad, FreeCAD), software development (Python, Eclipse), and fabrication (Cura, LinuxCNC).	<b>3 Hours</b>
<b>ELECTRONICS FUNDAMENTALS AND TOOLS</b> Introduction to basic electronic components (resistors, capacitors, transistors, etc.), Understanding of electronic circuits and their functions, Hands-on practice with CircuitJS and Falstad, Simulating and analysing electronic circuits, Introduction to Arduino and Raspberry Pi, exploring their capabilities and applications, Designing PCBs using KiCad and EasyEDA, Understanding PCB fabrication processes	<b>6 Hours</b>
<b>SOFTWARE PROTOTYPING AND TOOLS</b> Benefits of rapid prototyping in product development, Iterative design and testing, Wireframing tools (Balsamiq, Figma), UI design tools (Sketch, Figma), Programming languages (Python, JavaScript), Testing frameworks (Selenium), No-code platforms (Bubble, Adalo, Wix, AppGyver), Building functional prototypes without extensive coding	<b>6 Hours</b>
<b>FABRICATION AND PROTOTYPING</b> Overview of fabrication techniques (3D printing, laser cutting, CNC machining), Prototyping methods for physical products, using tools like Blender, TinkerCAD, or Fusion 360, Creating 3D models for physical prototypes, Hands-on experience with laser cutting and engraving, Understanding their applications and limitations	<b>7 Hours</b>
<b>SIMULATION &amp; DEMONSTRATION</b> Integrated project demonstration, explaining the design process, technical choices, and outcomes, simulation showcase to demonstrate their understanding of various technical tools and prototyping techniques	<b>8 Hours</b>
<b>Theory Hours: 0</b>	<b>Tutorial Hours: 0</b>
<b>Practical Hours: 30</b>	<b>Project Hours: 0</b>

<b>Course Content</b>	
<p><b>Introduction to Problem Solving and Ground Rules</b> Introduction to problem-solving strategies without mentioning Design Thinking-Emphasize problem-solving attitudes, mindsets, and behaviours necessary for iterative problem solving (e.g., openness to failure, patience, empathy)-Set ground rules for the course, including incentives for creative risk-taking and penalties for non-participation or lack of reflection-Overview of the Design Thinking process and its importance.</p>	<b>6 Hours</b>
<p><b>Empathy and Problem Definition</b> Techniques for understanding user needs, including observation, interviews, surveys and focus groups-Importance of secondary research as a complement for the above-mentioned methods-Introduction to empathy cycles: involve students in two empathy cycles before and after problem definition-Finetuning problem definition based on user insights.</p>	<b>6 Hours</b>
<p><b>Ideation and Concept Modelling</b> Brainstorming ideas and selecting feasible solution-Creating concept modelling to visualize ideas-Include an empathy cycle after students propose solutions, allowing them to revisit and reshape their solutions based on further insights from users.</p>	<b>6 Hours</b>
<p><b>Prototyping and Testing with Models</b> Building basic prototypes using simple materials (e.g., cardboard, clay)- Introduction to different prototyping methods (e.g., low-fidelity vs high-fidelity models) for different contexts: product design, space design, policy, and digital/e-commerce solutions-Conduct an empathy cycle after the prototype is developed to gather user feedback and refine the prototype.</p>	<b>6 Hours</b>
<p><b>Iteration and Final Modelling Project</b> Students refine their prototypes based on feedback from the empathy cycle-Finalize prototypes for presentation based on consistent feedback loops.</p>	<b>6 Hours</b>
<p><b>Presentation, Reflection, and Learning Summaries</b> Students present their final projects and reflect on their learning journeys, including how their understanding of problem-solving and empathy evolved during the course-<b>Learning Summary Activity:</b> Each student presents their individual journey and learning outcomes from the empathy cycles and iterations-Peer review and group discussions.</p>	

<b>Theory Hours:</b>	<b>0</b>	<b>Tutorial Hours:</b>	<b>0</b>	<b>Practical Hours:</b>	<b>30</b>	<b>Project Hours:</b>	<b>0</b>	<b>Total Hours:</b>	<b>30</b>
